Systems Analysis Branch/P&PS/OL
WEEKLY STATUS REPORT
Week of 5 to 9 September 1983

I.   Major Activities During the Past Week:

A. Support to OL:

        FARS (Federal Automated Requisitioning System). The FORM2216
has been moved to production. The modifications made to this
program will allow the FORM2216's to be printed on the high speed
printer without skipping, and will also print three forms if the
routing indicator is equal to GSR. The program will still have to
be modified in the near future, so that the FORM2216's can also be
run on the small printer with no problems. [   ] (U)

        REALESTATE (Realestate System). 1184 selected records on
file were updated with a new [   ] code using RAMIS software
commands rather than having the user change them via the menu
process. This was done on an immediate basis to provide up-to-
date reports for training classes given by Real Estate &
Construction Division personnel. [   ] (U)

        ICS (Inventory Control System). [   ] was notified
by DBCC of a problem with the ICS offline data base on September
5th. After consulting with [   ] in Production, ODP, it was
determined a restore of the data base to September 1st was
required. During the restore several abends occurred due to
timing. The timing problem was resolved and Jon was informed on
the 8th that the data base was now in order. [   ] (U)

        AVRS (Agency Vehicles Records System). The NIPS data base
had to be restored for the AVRS system. [   ] (U)

        MISCELLANEOUS. Daily meetings on the status of GAS
Enhancements were held during the week and will continue till next
Thursday. [   ]
from System Analysis Branch, P&PS/OL, attend these meetings.
Minor problems continue to surface with the interface
modifications. However, they are being remedied quickly and to
date have had no impact on the Initial Operating Capability (IOC)
date of October 1. Procedures are being written to handle the
morning and evening processing by DBCC staff and rerun procedures
in case an abend occurs. [   ]
SAB/P&PS/OL, and [   ] D/ICS/PBS, are currently working on
several of these procedures. [   ] (U)

STAT

Paperwork has been started for the purchase of the fifth OL WANG
Alliance system in Page. This one is being purchased by Supply
STAT   Division for installation[   ](U)

A demonstration copy of the CONDOR data base management system
(DBMS) has been received. It is being tested on the WANG personal
computer for possible use for stand-alone micro systems.
STAT   [   ](U)

II.   General Items:

A. Support to OL:

STAT   TRAINING. [   ]completed the 3-day 'GIM-II
STAT   UTILITIES' course given by Training Staff, QAD/ODP, at[   ]
Building. This training was necessary in order to provide
programming support to the GIMS OL Applications assigned to the
STAT   System Analysis Branch, P&PS/OL. [   ](U)

III.   Problems:

None to report.

IV.   Upcoming Events:

None to report.
